```sql
-- Create the table
CREATE TABLE Ogrenciler (
    ID int IDENTITY(1,1) PRIMARY KEY,
    Ad varchar(255),
    Soyad varchar(255)
);
-- Insert 15 records into the table
INSERT INTO Ogrenciler (Ad, Soyad)
VALUES ('Ali', 'Ak'),
       ('Ayşe', 'Er'),
       -- ...
       ('Name15', 'Surname15');
-- Declare variables to hold the data
DECLARE @ID int;
DECLARE @Ad varchar(255);
DECLARE @Soyad varchar(255);
-- Initialize the ID variable
SET @ID = 1;
-- Start the WHILE loop
WHILE @ID <= 10
BEGIN
    -- Get the data from the table
    SELECT @Ad = Ad, @Soyad = Soyad
    FROM Ogrenciler
    WHERE ID = @ID;
    -- Check if the ID is 3 or 6
    IF @ID = 3 OR @ID = 6
    BEGIN
        -- Use CONTINUE to skip this iteration of the loop
        SET @ID = @ID + 1;
        CONTINUE;
    END
    -- Print the data
    PRINT CAST(@ID AS varchar) + '. öğrencinin adı ve soyadı ' + @Ad + ' '
+ @Soyad;
    -- Increment the ID variable
    SET @ID = @ID + 1;
END
```
